

Declaration of performance Nr. 338/PWC/03-2025

1. Unique identification code of the product-type:

PFEIFER Wall Shoe PWC

2. Intended use:

The PFEIFER Wall Shoes are intended to be used together with the PFEIFER Foundation Anchors in order to firmly connect prefabricated reinforced concrete walls of strength class C30/37 or higher to floor slabs using a screw connection. For this purpose, the wall shoes are installed on the face side of prefabricated walls, while the foundation anchors are anchored in previously made foundations, floor slabs or walls (top extremities). The connection system may be used to produce pinned as well as rigid connections in order to transmit tensile forces as planned.

Product sizes: PWC 16H, 20H, 24H, 30H, 36H, 39H, 30P, 36P
Version V1 and V2

Material components and properties: Steel S355J2+N according to the EN 10025-2
